Partial list of what we've learned: 7) Lincoln illegally implemented martial law; 8) Congress was illegally brought back into session under the illegally declared martial law and since then, has not setting as a constitutional legislative body, as such congress is acting without constitutional authority; 9) Lincoln was assassinated just days after the end of the civil war and his implementation of martial law has never been declared over and is still in progress, thus the country is not operating under *lawful civil authority*; 10) The original and ratified 13th amendment was stealthily set aside and illegally replaced with a new 13th Amendment followed by an illegally passed 14th Amendment; 11) The 14th Amendment provided a new class the class of "citizen" with attachment and obligation to the laws and jurisdiction of the (corporate) Federal Government. An attachment and obligation that does not exist with the class of "Citizen" in the organic constitution; 12) "Person" is not a *human being* as used in the 14th Amendment, it is a corporation.

After the North prevailed in the civil war, the *creditors* of the United States argued that, due to the chaos in America at the time, the *American beneficiaries* (the people) of future generations, could not be trusted with *Constitutional powers*, nor could we be trusted with the *political / monetary system of free enterprise* created by the founding fathers and embodied in the Constitution. The *creditors of the United States (banksters)*, using their influence as America's creditor, attempted to implement their plan to *take over* by persuading Lincoln to assist them.

Lincoln's resolve in this matter was quite admirable. He said, "the Government should create, issue, and circulate all the currency and credits needed to satisfy the spending power of the government and the buying power of the consumers. By the adoption of these principles, the taxpayers will be saved immense sums of interest. Money will cease to be the master and become the servant of humanity... The privilege of creating and issuing the money is not only the supreme prerogative of government, but it is the government's greatest opportunity." As can be seen, the overt goal to *privately* issue the currency of the United States existed even before the civil war.

"Give me control of a nation's money and I care not who makes the laws." - International banker - Mayer Amschel Rothschild.

Currency, known as the *Lincoln Greenbacks*, began to be issued by government, not private banks. This currency had no usury charge (interest) upon its issuance saving the American people considerable sums. Lincoln was assassinated by John Wilkes Booth. Booth was reported to have been tracked down by "Union Soldiers" and killed 12 days after the assassination of Lincoln. However, there are other reports and assertions regarding Booth.

"For this patriotic act, he [Lincoln] was assassinated by Booth, a Rothschilds agent. and contract killer, who was later spirited away to England where he lived out his life comfortably on a pension provided by the Rothschild bankers." - JOHN E. KOVACS.

It's certainly possible that "Union Soldiers" could be bribed by someone as wealthy as Rothschild. Who knows?

The Private Law of Washington, District of Columbia:

In 1868 the 14th Amendment was alleged to be ratified. I say "alleged" because current evidence appears to prove that it was not lawfully ratified. Three years later, in 1871, the federal government defaulted [failed to pay] on its debts, resulting in bankruptcy of the United States of America. What came out of this, for those who understand such circumstances, was a near deathblow to the Republic of the United States of America.

On February 21, 1871, England laid claim to the property of the Federal Government, held as collateral for the national debt and England became the owners of the land mass we know as *Washington, District of Columbia* and any other property to which *the District* held title. **It was at this time, England, as the owner, forced incorporation of Washington, District of Columbia and names for this new corporation.** The corporate names include "THE UNITED STATES", "THE UNITED STATES OF AMERICA", "U.S.", "U.S.A." and "USA", as well as other titles declared by the *District of Columbia Organic Act of 1871*. Where were our *free and independent main stream journalists and newspapers* when this occurred? And where is this information in current education?

It is to be noted that many of these copyrighted names carry the implementation of the article "THE" in their names. America was known as a union of the "United States of America," not a union of "the United States" before this time. The article "THE" does not exist when we refer to other countries, for example, Germany, or Canada, or Mexico. *It is the British controlled corporation*, "THE UNITED STATES OF AMERICA", who exclusively uses the article "THE" in the name. And this makes the corporation distinct from the "United States", or the "United States of America."

A significant change in American law occurred when our United States became a bankrupt nation. It then only had the power to settle civil disputes, not criminal matters. England, now the owner and sovereign to the former property of the *constitutionally authorized* Federal Government, provided that England's ever changing criminal law would now dominate American criminal disputes which include actions under *commercial law*. Since then, England has been attempting to fill the "law" gap created by the bankruptcy without alerting, **or alarming**, the American people. Thus, we have been mostly deceived into believing that everything is continuing as usual. But it is not continuing as usual. Since this time the United States of America (or more correctly THE UNITED STATES OF AMERICA) has been exclusively governed by foreign, private, corporate law and Washington, District of Columbia has been under British control.

Now we are beginning to understand our situation. More to come... stay tuned.
