

Do We Have A Clue?

8th in a series - © 4-7-2009

Partial list of what we've learned: 13) Because our leadership failed to pay the national debt, England (our creditor) took title to the land mass we know as *Washington, District of Columbia* and any other property owned by the Federal Government 14) England then incorporated *the District* along with corporation names which include "the United States of America", "the United States", "USA", "U.S.A.", and others. This *British Controlled Corporation* is now in control of America; 15) the "united States of America" could now only adjudicate civil matters and not criminal matters. England's ever changing criminal law became the law governing criminal matters.

Interestingly and because of incorporation, certain people now needed permission (license) to use Britain's private copyrighted law. The people who use this British legal system of law, sometimes *for*, but most generally against the American people, are referred to as *attorneys*. The term "attorney" comes from "attorn," which means to *turn over* to another, to transfer *to another*. In old England's customs, the title of "attorney" was a reference to one who "*attorned*," which meant to *transfer money, or goods*. "Attorney's" served the King, or Queen's law (the rulers law), in the handling of disputes regarding *money or goods* with their peasant subjects. In today's world, attorneys transfer things of monetary value through court procedures to new owners, which are generally persons (corporations) or government, which is also a corporation. Ever wonder why there is a bond attached to every criminal case? – Rulers law.

In order to use his "private law" of England and avoid copyright infringement, attorneys must be licensed. Using England's private copyrighted law, attorneys are in court for profit and gain, therefore must be licensed. The average citizen, on the other hand, need not have a license to use the private copyrighted law because he (or she) is not in court for profit and gain. They are forced to use this private law to defend themselves in a [corporate] UNITED STATES court.

Licensing for attorneys is provided by the BAR (British Accreditation Regency). The private copyrighted law now implemented in "The UNITED STATES" is the *rulers law* and is intended to benefit the *ruler* of "The UNITED STATES", not the people of the united States of America. This law is intended to provide an ever increasing obligation of the American people to transfer more and more of their productivity (money) to *the ruler* (otherwise identified as the *creditor of the UNITED STATES*).

In upholding British copyrighted law, attorneys have limited legal power. Under the law of the republic of the "united States of America" the *lawyer* is king, not needing a license to practice law. Most Americans believe that one needs a license in order to practice law, this is not exactly true. One needs a BAR license to avoid copyright violations and infringement. The path to this license is the BAR examination and membership in the American BAR Association. The American BAR Association is simply an *appendage* of the BAR Council, which is the English BAR association.

The year 1871 began a significant change in America's legal history. Congress and Senate, now sitting as the Board of Directors (legislative body) of a *municipal corporation* was now obligated to pass laws consistent with the objectives, goals and desires of Britain, who owned and controlled the corporation we now know as "The UNITED STATES", which is NOT the united States of America [republic of]. Thus, any so-called national laws that came into effect were implemented under the private law of Britain and not constitutional.

However, there were, and are, still *sovereign Citizens* in America, Citizens which are NOT 14th Amendment "citizens." Any *sovereign Citizen* is exempt from these private British laws, which is almost all law today, it's all commercial. It's all *commercial* and intended to ring the government cash register by taking more and more of our productivity.

On the other side of the coin, anyone who *does not* dispute being a 14th Amendment "citizen" is presumed to be such and is subjected to all this un-constitutional commercial law. At the time (back in the 1800's) it was only necessary for the people to claim "*sovereign Citizen*" status to avoid being subject to Britain's private corporate law. The question facing Britain was how to get the American people to agree (volunteer) to make themselves subject to Britain's private laws.

The plan and its implementation is found in President Franklin Roosevelt's New Deal. Enter two deceptions, Social Security, and the *registered Birth Certification*. *Registering* always transfers title (ownership) of the named object to the government. In the case of the *birth certification*, the object transferred is the child. Obtaining a Social Security account is a contract with a Federal Municipal Corporation controlled by Britain. And this contract carries obligations which are not fully disclosed. (See the *Deception Abounds* series of columns when they become available on this web site).

President Franklin Roosevelt said, "In politics, nothing happens by accident. If it happens, you can bet it was planned that way." When Britain took title to the collateral being held in lieu of payment of the national debt obligation, the debt defaulted to the Union States. I believe that if we carefully examine the constitution we may well find that it is a *security agreement* which provides for the debt to be paid by the Union States should the united States of America default, as occurred in 1871.

That debt was due and payable in 1909 and this time the Union States defaulted. With hat in hand, they groveled and asked for more time to pay. Britain agreed to twenty-years additional time, but there were stipulations (conditions). One condition was that America would create a *central bank*, which was brought into existence in 1913. We know it as the Federal Reserve Bank. Calling it the ***FEDERAL RESERVE BANK*** was a great deception for it is NOT a bank of the Federal Government as many Americans have believed over the years, it is a privately owned bank under control of Britain and other foreign investors. The second and third conditions were that Britain's proposed 16th & 17th Amendments would be ratified.

The Federal Reserve Bank came into existence in 1913. And also in 1913, the proposed 16th Amendment was declared ratified, this is the one we know as the *income tax amendment*.

Twenty years after Britain's 1909 agreement to *help the United States* with its debt obligation for 20 years, economic default and despair loomed heavily on our horizon with the *engineered* stock market crash of 1929. Knowing what was planned and coming for the United States, J. P. Morgan and *Kuhn & Loeb* illegally sent advanced warnings to their *investment insiders* regarding the coming economic collapse. These investors then pulled out of the stock market. The problem which effectively initiated the economic crash and following depression was created by "Warburg's" (an international bankster) Federal Reserve System.

It should now be clear that failure to pay our national debt is what is subjecting us to unconstitutional law, loss of freedom, financial collapses, obligating us to pay ever increasing taxes and levies, and subjecting us to Britain's law. It should also be clear why our leadership endeavors to control curriculum in public schools. But there is still more to come in order for us to get the big picture of our current status and plight.
