In the last column I left off by saying: “Since the currency (Federal Reserve Notes) is issued upon the creation of debt obligation, both public and private, it is a ‘debt currency.’ Now, does anyone think they can PAY a debt with a debt? No, we cannot. Therefore we cannot own anything. Does this sound like I’ve lost my marbles?”

Now it’s time to see if I have lost my marbles. From the congressional record we read:

"Under the new law the money is issued to the banks in return for Government obligations, bills of exchange, drafts, notes, trade acceptances, and banker's acceptances. The money will be worth 100 cents on the dollar, because it is backed by the credit of the Nation. It will represent a *mortgage* on all the homes and other property of all the people in the Nation." - Congressional record, March 9, 1933, House, Congressman Patman, 73rd Congress, Special Session, Volume 77, part 1, page 83

“IT WILL REPRESENT A MORTGAGE ON ALL THE HOMES AND OTHER PROPERTY OF ALL THE PEOPLE IN THE NATION.” As you can see, we cannot truly own anything. We can hold *equitable title* to property, which obligates us to all the levies government assigns, but we cannot hold legal title. All property in the united States of America was set up to be held in Allodium (Allodial title), but very little property is so held today. For reference, the lowercase “u” on “united” is not an oversight or accident, it is a reference to the republic of the united States of America, and not a reference to the corporate United States of America.

This extracted quote from the congressional record is debate over the Banking Relief Act of March 9, 1933. As we can clearly see, all our homes and other property has been mortgaged to the banks for “ink on paper”, what we call Federal Reserve Notes. Therefore, until we pay our national debt, we cannot own anything, nothing. If you truly owned property, no one could take it from you (Allodial title). Can we think of anything that government agents cannot and will not take from us, including our lives? Maybe a McDonald’s hamburger if we eat it fast enough. We also see evidence of ownership in other government documentation.

"The ULTIMATE OWNERSHIP OF ALL PROPERTY IS IN THE STATE, individual so called ownership is only by virtue of Government. i.e. Law, amounting to mere user. And use must be in accordance with law and subordinate to the necessities of the State." – Senate Document No. 43, Under Contracts Payable in Gold, 1933

As a people we cannot own anything because we cannot pay for it. Under our current economic tyranny, we can only “DISCHARGE” our debts, we cannot PAY our debts... see HJR192 [HJR=House Joint Resolution]. And if we cannot truly own anything, then we cannot have freedom and liberty for ourselves or our grand children, nor will we be successful in this economic

system. Nor will the economic system be successful or sustainable, we are seeing evidence of that currently, if we have our eyes open and care enough to look.

Now, are we beginning to see the absolute necessity that we begin to elect leaders that will pay off the national debt so that we can get our freedom back. We are also seeing the need to elect local leadership who actually comprehends these facts and begins to act to free the counties and cities from the economic tyranny, stranglehold, and enslavement. If we do not, then we have sold our children, and grandchildren into economic slavery, in which case we should never tell anyone how much we love them.

Since the Banking Relief Act of March 9, 1933 gives government the authority to regulate us in everything we do which is commercial, everything we do has been converted to a “commercial activity”. Enter the need for the commercial police, who will issue citations for the fun of riding your bicycle in an empty skate board park, a commercial activity covered by commercial law. It is easy to recognize *commercial law*. Generally there is no injured party. In effect, we no longer have a “right to survive”, we can only survive with economic privileges granted by government. And now it appears that the economy, as managed and created by our leadership, is about to collapse. One of the reason we see several families sharing one domicile or apartment.

Most employers today do not know that a Social Security card is voluntary. Participation in Social Security is complex. It came into existence in the 1930's along with a lot of other questionable economic law. But simply put, in joining Social Security the individual is declaring that he, or she, is incompetent, inept and incapable of being responsible for their self and is petitioning the federal government to take care of them from cradle to grave. The government is quite willing to do this, but since the individual is asking the government to become his parent, then he, or she, will be subject to the rules (laws) of the parent. This refers to all the corporate rules and laws of Washington, District of Columbia, what we know as the [corporate] United States. And when those rules and laws cause us grief, we whine instead of changing our status.

If one has no attachment to federal jurisdiction, either through participation in Social Security or a government issued Birth Certification, then the individual would not be subject to the mountain of [corporate] law from that jurisdiction, which includes the income tax laws. This is why they tell us it's all voluntary, it is. We volunteer through ignorance acquired from a public school system where the curriculum is controlled by government. As a local teacher recently said, (paraphrased) - “it's time to *man-up*”. I accept that, it is time for the public school system to “man-up” and begin finding the truth, followed by teaching it. It is only because of the total lack of true education we receive from public schools that we ignorantly volunteer into a system of economic enslavement.

Tune in for next week for continuation of this discussion.
