In the last column it was learned that we Americans became an enemy of the United States in the language of the Banking Relief Act of March 9, 1933.

The passage of the Banking Relief Act resulted in the entire legal system of the United States being overhauled to accommodate the administration of the bankruptcy of the UNITED STATES through military occupation and tribunal. Let us remember that the red, white and blue now flies above the State flags, we're occupied. Before the passage of the Banking Relief Act, the law of the republic was the common law.

However, with the passage of the Banking Relief Act, the common law has been set aside and the law of today is the Uniform Commercial Code (the ruler's law). Ask any of the boys who received a ticket (citation) for riding their bicycles in an empty skate board park about the uniform commercial code and commercial law where there is generally no injured party. There is generally no injured party because the goal is to ring the cash register, not administer fair dealings and justice.

Our relationships with everyone are commercial. For example, our marriage is a commercial relationship. How do we know this? Because it was undertaken with a commercial license. Furthermore, our licensed marriage is illegal. How do we know this? Because a *license* is permission by competent authority to do what is otherwise *illegal*. Look it up.

Of course it is really not an illegal activity, but we are all supposed to believe that we need the license to marry. When we apply for a license to marry, we are tacitly admitting that we do not have a natural right to marry. In reality we do have that right, but because we are deceived by our schools and others we trust, we don't know that. We can marry under the common law without license. Marriage can be as simple as a man and woman agreeing to be husband and wife, entering their agreement in the family bible (a legal record), perhaps witnessed by a couple of friends who sign the bible as witnesses to the marriage, and then cohabiting as man and wife.

A *common law* marriage may also be formalized through ceremony, but most churches of today will not marry a couple without a license. We need to remember that most churches of today are 501 (c) (3) tax exempt corporations, subject to the territorial law of the [corporate] UNITED STATES. Taking this comprehension a step further, the common law is biblical law applied, which is to say it is "God's Law" applied. But a [corporate] church of today has no intention of representing God's Law, it represents corporate territorial law, and there is a big difference. And since the church doesn't represent God's law, it is not going to perform a marriage ceremony in the *eyes of God*. Therefore the church of today will not perform a *common law* marriage. And it is another deception for the unwary.

In an earlier column in this series we learned that government *Birth Certifications* are part of the process which makes the new born child the property of the government, and that it occurs by the hand of the natural parent. Well, it's not necessary we have a government issued birth certification. I know parents who have only a *hospital issued* birth certification, but even that is not necessary. In the same way that marriages can be recorded in the family bible as a lawful record, so can births and deaths. And then you would still have a lawful record. Please note the use of the term "lawful" which is different than "legal". The term "legal" pertains to the unconstitutional territorial law we have discussed in this series.

After the passage of the Banking Relief Act, all of our normal and regular activities were converted into a commercial activity in order to regulate us in everything we do. And so all law became commercial law and all of our relationships became commercial in nature. Even the relationship we have with our children is commercial. And it's all accomplished through our voluntary acts of permission.

The Banking Relief Act was emergency legislation passed under the *rule of necessity*. "Necessity" knows no law. It's the rule of self defense. We know it is unlawful (illegal) to kill another human being, but if we do so in defense of our lives (which includes family) then the killing was done as a necessity. When, and if, that is established, we will go free.

When Congress declares "necessity" in the enabling clause of an act, as was the case in the Banking Relief Act, this is evidence that this Act is un-constitutional, in other words, *unlawful* or *illegal*. Otherwise the declaration of *necessity* is not needed. Since the *rule of necessity* knows no law, its invocation makes any unconstitutional / unlawful act, now constitutional and legal, because it was *necessary*. Now, once the unconstitutional act is passed and operational, layer upon layer of law can be passed, all pursuant to, and deriving its authority from what is otherwise an un-constitutional act.

Soon afterward followed the *public salary tax act* of 1939, which eventually became the income tax code. Register *birth certifications* came into being and we joined social security with our "registered" birth certifications, thus entering into a contract with a federal municipal insurance corporation, which, unknown to us, makes us an employee... of government. We didn't have to get a social security number [it's voluntary], but we thought we did. And today's employers are generally so ignorant they won't hire anyone without a Social Security account, and so they become instrumental in the destruction of the country and freedom. We voluntarily agree to abide by the laws of the territorial United States. A great trick (deception), is it not?

ZIP Code. ZIP = Zone Improvement Plan. More specifically, *federal* Zone Improvement Plan. Ten federal zones, zero through nine. You live in the ninth federal zone, in Willows it is (9)5988. That's why the ninth circuit court of appeals is in San Francisco... ninth federal Zone. It's all part of Social Security. If you have a number identifying you to be living in a federal zone, would you not be subject to federal territorial law? Yes, another deception not clearly taught by any of the institutions we trust with our lives.

Do the police know this stuff. Probably not. NO ONE is supposed to know this stuff, none of

the *enemy economic slaves* are supposed to know. But it's especially important that none of the local leadership or code enforcers know what they represent. They are just expected to maintain the ignorant status-quo and implement policy (territorial law) that rings the government cash register for the administration of the bankruptcy and benefit of the creditor of the UNITED STATES. So give that boy riding his bicycle in the skate board park a citation, ka-ching goes the cash registers of the court, the prosecuting attorney, the defense attorney, and if anyone goes to jail, the incarceration system. It's about taking more and more productivity from the economic slave through commercial laws all pursuant to an un-constitutional act which made us an enemy of the United States.

The ADA (Average Daily Attendance) money is why the local public school system has targeted parents for arrest. School is government, it is listed on Dun & Bradstreet as publically traded for profit, and profit is the motive of administration, not education. Therefore, it's now easy to see why parents are targeted for arrest.

The list of enemies of the UNITED STATES includes teachers, school administrators, code enforcers and police, department heads of county and city government, government clerks, lawyers and attorney's, pastors, ministers, and priests of our local corporation churches. Everyone.

It's all corporate, it's all private, and it's all voluntary on our part. So we sign those corporate government documents, entering into a contract and making our self and our children enemy economic slaves, subject to United States territorial law. It has to be one of the greatest deceptions of all time, better than any magic act. All made possible by our local leadership and administrators.

More deception to come, so stay tuned.
